

Faculty Position  
Eötvös Loránd University (ELTE)  
Budapest, Hungary

The Eötvös Loránd University (ELTE) Institute of Physics seeks candidate for a faculty position starting March 1, 2021. The search is for a candidate to be hired at assistant professor (adjunktus) or associate professor (docens) level. Our Institute is committed to fostering interdisciplinary research that can address grand challenges facing our society. We seek candidates who will provide inspiration and leadership in research, contribute proactively to both undergraduate and graduate-level teaching, and add to the diversity of the academic community.

Faculty duties include teaching at the graduate and undergraduate levels, advising students, and conducting research. Candidates must hold an earned Ph.D. in physics or a related field by the beginning of employment. Candidates' areas should be related to the condensed matter physics basis of quantum technology.

Applications must include a cover letter, curriculum vitae, a 2-page statement of research, and teaching interests and goals. They should also include references of no more than three publications and name two individuals who are – upon request -- ready to submit letters of recommendation on their behalf. This information should be sent to [groma@metal.elte.hu](mailto:groma@metal.elte.hu) and [vattay@elte.hu](mailto:vattay@elte.hu) by January 31, 2021, when the applications' review will begin. For the determination of salaries and benefits, the provisions of law XXXIII of 1992 on the Legal Status of Civil Servants shall apply.
